

21:03

Jeffrey Tatanus: test again

Geomeh has joined this chat.

jonnyoosting has joined this chat.

Geomeh: Hello.

Geomeh: has joined the room, I guess.

jonnyoosting: hola

Jeffrey Tatanus: the original chat didnt work for megan

Geomeh: Hey Jon, how are you?

Geomeh: Thank you, Jeff.

WKUComanche has joined this chat.

jonnyoosting: Doing well thanks. And you? Rested up after the crazy weekend?

Jeffrey Tatanus: okay, we're all here now!

21:05

Geomeh: Where do we start?

WKUComanche: you first

Jeffrey Tatanus: okay, so as we were saying before... the point of these chats is normally to update our faculty mentor on the progress of our research / innovating

Jeffrey Tatanus: but marjorie is not here, so we will update each other and i will save this chat for our records.

WKUComanche: perfect

jonnyoosting: Well, we should probably talk about how we are going to be communicating regularly.

Jeffrey Tatanus: does one of you know how to invite people into the chat, if i am for some reason booted from this?

Geomeh: This time is good for me most weeks. How about the rest of you?

jonnyoosting: We're supposed to be blogging regularly and emailing each other about our work for the week

Geomeh: Why would you get booted?

jonnyoosting: yes

Jeffrey Tatanus: oh, technology can be goofy.

Jeffrey Tatanus: ya never know.

jonnyoosting: i know how to invite

WKUComanche: i'll invite you back jeff

Jeffrey Tatanus: perfect.

jonnyoosting: anyway, the schedule: Marjorie can't do weekends, so we need to chat twice during the week

jonnyoosting: Tues and Thurs?

Geomeh: Fine by me. Same time?

WKUComanche: tues thurs for me too

Jeffrey Tatanus: works fine with me, 9pm.

jonnyoosting: Yeah, it's a go!

Jeffrey Tatanus: hopefully it will also work for marjorie and whoever our new teammate is.

jonnyoosting: Second thing - blogging. I think jeff and I are the only ones posting

WKUComanche: do we want a new teammate

Jeffrey Tatanus: ryan has an account set up, and i will help megan set up a blogging account tonight

Jeffrey Tatanus: i think having one more person to spread the work with would be a good idea.

jonnyoosting: ok cool. that an email are our two non-chat communication channels

21:10

Geomeh: Probably right.

WKUComanche: a new person missed last weekend

Jeffrey Tatanus: indeed

jonnyoosting: as for a new member, if they are a genius, they are welcome!

Jeffrey Tatanus: or even if they are just a super hard worker... distributing the load will be helpful

WKUComanche: besides communication how much work is it?

jonnyoosting: It's a tough call though - if they are confused and unsure about the project we might spend more time explaining it then getting stuffs done

Jeffrey Tatanus: we have to put together presentations of our ideas

WKUComanche: i thought the hardest was the idea itself

Jeffrey Tatanus: yes, thats the bulk of the work

jonnyoosting: Ryan, will the new person be from WKU?

jonnyoosting: any idea who they're considering?

WKUComanche: i heard it would be

Geomeh: The workload probably depends on what we decide to do.

WKUComanche: a guy named phillip

WKUComanche: megan's right

Geomeh: The workload probably depends on what we decide to do.

Geomeh: The workload probably depends on what we decide to do.

Jeffrey Tatanus: indeed.

jonnyoosting: know anything about him?

know anything about him?

Geomeh: The workload probably depends on what we decide to do.

Jeffrey Tatanus: megan, did you just send the same message four times?

jonnyoosting: she's adamant!

WKUComanche: i know nothing

Geomeh: Accidentally. My computer is seizing after every few letters or commands.

Jeffrey Tatanus: your mac?

Jeffrey Tatanus: are you using ichtat or AIM for the mac?

21:15

jonnyoosting: Okay, I posted some links to sites on the blog for ya'll to check out. Anybody else have any cool links to share with the group?

Jeffrey Tatanus: did you see the last link i posted? i uploaded a PDF of Pew Internet Life's research on online news

Jeffrey Tatanus: demographics, etc.

Geomeh: Good find.

jonnyoosting: yeah, I saw that. it looks like broadband users are really utilizing their bandwidth and hitting the net web interworld for news

Jeffrey Tatanus: that could be handy in trying to find what sort of niche we want to adapt to

Jeffrey Tatanus: yes, and broadband is catching on more and more

jonnyoosting: Other cool sites?

Jeffrey Tatanus: yes

WKUComanche: poynter.org

Jeffrey Tatanus: i was just gonna say that!

Jeffrey Tatanus: and there is also the diane rehm clip that we were discussing before... do any of you still have the URL i sent when we were testing the chat before megan arrived?

WKUComanche: mediabistro.com

WKUComanche: i lost it

Jeffrey Tatanus: i will try to find that again

21:20

jonnyoosting: what's mediabistro?

WKUComanche: like poynter

Jeffrey Tatanus: jon, can you create a linkified list of these to put on the blog?

jonnyoosting: gotcha. on that note, cyberjournalist.net

Jeffrey Tatanus: mashable.com could also be interesting, to see what is out there for social networking

jonnyoosting: proolly.

WKUComanche: <http://www.mediabistro.com/tvnewser/>

Jeffrey Tatanus: cyberjournalist is associated with the ONA, if i recall correctly

WKUComanche: perfect

jonnyoosting: i'm blogging the list right now as we talk

Jeffrey Tatanus: and if we can say we used the ONA's resources for our research, that would be spectacular

WKUComanche: exactly

Jeffrey Tatanus: so since we have to have 10 ideas each posted by tomorrow, why don't we float some ideas off of each other?

WKUComanche: i'll go

jonnyoosting: yeah, cyberjournalist really just blogs cool stuff journalists are doing with technology

Jeffrey Tatanus: okay

WKUComanche: good luck matching it to the project though

jonnyoosting: Ryan go ahead, but one thing though - I was kind of thinking the end of the week was sunday not friday?

jonnyoosting: for the list

Jeffrey Tatanus: ah true, thats probably fine

Jeffrey Tatanus: i would go with sunday

WKUComanche: i thought the web personality everyone sets up on every site they like that's personalized

jonnyoosting: gives us a couple more days to brainstorm

WKUComanche: if i could make myself one avatar to be universal on the web

Jeffrey Tatanus: but why dont we throw some ideas around to spark us

Jeffrey Tatanus: so one identity for all the web?

WKUComanche: i thought the second life avatar was 3d and there's 7.5 million already

WKUComanche: they could spin it off to be used anywhere it was accepted

Jeffrey Tatanus: and then have a single sign on for everything?

WKUComanche: it's already established, they just need support elsewhere

WKUComanche: right

21:25

WKUComanche: import it anywhere you want to virtually have a presence

Jeffrey Tatanus: take a look at OpenID... some organizations are trying to do something like that.

jonnyoosting: what function would the avatar have in a 2d setting?

WKUComanche: a pic maybe

Geomeh: Use an avatar for everything online?

WKUComanche: it's obviously going that way, this would consolidate

WKUComanche: i don't know how to make it a news innovation

jonnyoosting: hmmm... i just browsed the openID site and it's probably something we should all read. i'll add it to the list

Jeffrey Tatanus: the only difficult thing i find with that is that secondlife is very fictionalized

WKUComanche: and if another source tried the idea, second life could spin it off and beat everybody to it since its there

Geomeh: The problem is the amount of cooperation required between sites.

WKUComanche: right, but there are two other i heard of very similar

Jeffrey Tatanus: like really would we want "Pantysniffer McDoodles" writing our news?

Jeffrey Tatanus: especially if he/she looks like a dragon

Geomeh: [System Message] User is not available.

WKUComanche: i think most people would have 2 or 3 just like now

Geomeh: [System Message] User is not available.

jonnyoosting: haha

WKUComanche: valid point

WKUComanche: that idea came to me last sat. night and it's been haunting me until i could tell everybody right now

Jeffrey Tatanus: whilst drinking? lol

jonnyoosting: well, it's something to keep thinking about. it will haunt us all 😊 let's keep throwing out ideas.

Jeffrey Tatanus: i think geotagging is a BIG deal for the future of online news

WKUComanche: explain

jonnyoosting: explain

Jeffrey Tatanus: adding GPS coordinates to news stories

21:30

jonnyoosting: you mean geocoding - same thing?

WKUComanche: for google maps?

Jeffrey Tatanus: yeah, same thing

jonnyoosting: yeah, i've been thinking about that a lot as well

Jeffrey Tatanus: for google maps or whatever mapping system (i am sure yahoo news wouldnt want to use google maps!)

jonnyoosting: so how do you think it could facilitate local news - in a new way

Jeffrey Tatanus: there could even be primary / secondary locations.... such as where the story happened and where the people involved are from

WKUComanche: this sounds really good

jonnyoosting: yeah, that sounds interesting

Jeffrey Tatanus: what about being able to mark up a map online with places that you find relevant.... place of business, school, home, places where family/friends live

jonnyoosting: I was also thinking about a comments system where user's comments are geographically represented, so you could see what neighborhoods are talking about what issue

WKUComanche: oh fuck yeah

WKUComanche: that's brilliant

Jeffrey Tatanus: and getting stories that are geographically relevant

WKUComanche: oh, edit that fuck out please

WKUComanche: that one too

jonnyoosting: 😊

Jeffrey Tatanus: like i really wouldnt want to see whats going on in kentucky, but WKU stories would now be relevant to me

Jeffrey Tatanus: and perhaps even ranking the importance of different kinds of stories

WKUComanche: ranking worries me about the news

WKUComanche: it's already sensationalized and offcenter

Jeffrey Tatanus: like a church picnic in my aunt's neighborhood in buffalo would be irrelevant, but a shooting would be

WKUComanche: i think the important news is buried

jonnyoosting: yeah, it does seem to happen more online

Jeffrey Tatanus: in the diane rehm clip, they mentioned WTC tower 7

Jeffrey Tatanus: something that was really buried

21:35

Jeffrey Tatanus: jon, do you have any ideas?

jonnyoosting: well, above I mentioned a geo-based comments section. I think this would apply to local news where you could see what neighborhoods people were commenting from. Hyper-local.

Geomeh: [System Message] User is not available.

Jeffrey Tatanus: definitely.

Geomeh: [System Message] User is not available.

jonnyoosting: I think Megan is having tehcnologlogichtech issues

Geomeh: [System Message] User is not available.

Jeffrey Tatanus: i guess so... i will try to help her with those issues

Geomeh: [System Message] User is not available.

Jeffrey Tatanus: it would be relevant for a local newspaper's site, but how would it work when we get on a more worldly scene?

Geomeh: [System Message] User is not available.

jonnyoosting: Dammit my message was too long and now i have to type it all over again!

Geomeh: [System Message] User is not available.

WKUComanche: i just emailed about the new group member, so I'll keep y'all posted

Geomeh: [System Message] User is not available.

jonnyoosting: Jeff - well we're supposed to be thinking of a community - not necessarily geographical, but it certainly could be

Geomeh: [System Message] User is not available.

Jeffrey Tatanus: kim (IC's faculty mentor) told me that we would hear about the new group member tomorrow

Geomeh: [System Message] User is not available.

WKUComanche: anybody thought of a niche idea?

Geomeh: [System Message] User is not available.

WKUComanche: an interest group or ethnic?

Geomeh: [System Message] User is not available.

jonnyoosting: another idea - an app for a cell phone that helps users become citizen journalists

Geomeh: [System Message] User is not available.

21:40

WKUComanche: blackberry's are almost there right?

Geomeh: [System Message] User is not available.

Jeffrey Tatanus: thats intruiging

Geomeh: [System Message] User is not available.

Jeffrey Tatanus: a lot of the news outlets have been calling for cameraphone shots, etc

Geomeh: [System Message] User is not available.

jonnyoosting: sure, but some sort of an easy to use program that takes some of the mystery out of it

Geomeh: [System Message] User is not available.

WKUComanche: right

Geomeh: [System Message] User is not available.

jonnyoosting: it would walk the user through the process

Geomeh: [System Message] User is not available.

Jeffrey Tatanus: would it be something that one particular news outlet would release?

Geomeh: [System Message] User is not available.

WKUComanche: geomeh is not available

Geomeh: [System Message] User is not available.

WKUComanche: geomeh is not available

Jeffrey Tatanus: so it would ask the right questions?

Geomeh: [System Message] User is not available.

Geomeh: [System Message] User is not available.

jonnyoosting: Well, i think it could be distributed to all news outlets and the user could set which papers to send it to.

Geomeh: [System Message] User is not available.

jonnyoosting: Well, it could easily ask the what, where, when, why, how, who questions

Geomeh: [System Message] User is not available.

Geomeh has left this chat.

Jeffrey Tatanus: and it could work in the payment incentive?

jonnyoosting: perhaps. if people are willing to do it for free, then let them. if not, provide incentive

jonnyoosting: anyway - another idea?

Jeffrey Tatanus: oh, i found another interesting site that you may want to take something from...

www.helium.com

WKUComanche: you are all keeping up with the sites you're suggesting so you can blog them right?

WKUComanche: i'm already jotting the ideas, but the websites too makes it confusing

WKUComanche: where's megan?

jonnyoosting: yeah - i'm creating a blog post right now

Jeffrey Tatanus: yeah, and i am going to post this transcript

Jeffrey Tatanus: im trying to work out megan's technical problems with her as we speak

jonnyoosting: good call - maybe we can post the transcripts on a separate page - like the about page, so that they don't clutter up the main blog with HUGE posts

21:45

WKUComanche: ok then i'll get another dew

jonnyoosting: not the about page, but create another one like it

WKUComanche: good one jon

Jeffrey Tatanus: well i was gonna post the PDF or something along those lines

jonnyoosting: sure

Jeffrey Tatanus: megan should be back in here any minute

pagreen@mac.com has joined this chat.

pagreen@mac.com: What different about this one?

Jeffrey Tatanus: there she is

pagreen@mac.com: Oh, I see. Thank you.

jonnyoosting: hey! you're back!

pagreen@mac.com: So what have I missed?

Jeffrey Tatanus: iChat has been updated more recently than AIM.

Jeffrey Tatanus: megan, you may want to do "View -> Show Names" so it doesn't get confusing with the way AIM shows

just icons.

Jeffrey Tatanus: *the way iChat shows icons

pagreen@mac.com: That's better.

pagreen@mac.com: Thank you.

Jeffrey Tatanus: no prob

jonnyoosting: megan, we've been talking about sites and ideas. Got any to share?

Jeffrey Tatanus: did you guys get a chance to look at helium.com?

pagreen@mac.com: Ideas, yes. Sites, no, nothing interesting.

Jeffrey Tatanus: share some ideas!

jonnyoosting: Jeff - i glanced over it real quick and it looks cool.

pagreen@mac.com: What is it?

Jeffrey Tatanus: it's a site where users submit articles and they are rated for their quality

Jeffrey Tatanus: i found it in an article in US News and World Report

jonnyoosting: it looks like readers write articles based on a question or topic suggested by the site. right, jeff?

21:50

Jeffrey Tatanus: i think so

jonnyoosting: anyway, megan - ideas!

WKUComanche: helium looks like pro con

pagreen@mac.com: Okay, have you guys heard of Club Penguin?

jonnyoosting: yeah, on some of the topics

Jeffrey Tatanus: like secondlife for kids, right?

WKUComanche: they pair entries with conflicting sides

jonnyoosting: what's club penguin?

Jeffrey Tatanus: brb... potty break

WKUComanche: megan continue

pagreen@mac.com: Okay. I was thinking that to develop the news-reading habit in kids, have a news game.

WKUComanche: what age group?

pagreen@mac.com: They have a Club Penguin news page, but make it a newscast with a quiz and rewards for getting the answers.

WKUComanche: cnn.com/education

WKUComanche: it think

pagreen@mac.com: The official cut-off is 18, but it's big with the elementary school set.

WKUComanche: sounds good

pagreen@mac.com: We could do something similar in 2nd life, using real news.

Jeffrey Tatanus: how open-source is club penguin?

pagreen@mac.com: What do you mean?

WKUComanche: second life for under 18 right?

Jeffrey Tatanus: like can we actually build something or does it have to be made by the company that owns it?

WKUComanche: SL is 18+

Jeffrey Tatanus: well second life has a "teen grid" but club penguin is more animated and cute

pagreen@mac.com: Pretty much like 2nd life for kids. I suppose we would probably have to work through the company, since the kids aren't coders.

Jeffrey Tatanus: and the kids dont have the ability to make their own stuff, right?

21:55

pagreen@mac.com: I know they can build and decorate houses and change their penguin color, but I think

that's about it.

pagreen@mac.com: At least, that's all my brother's figured out.

jonnyoosting: i like the idea of a news quiz for kids, are you sure no one else is doing it?

WKUComanche: cnn does

Jeffrey Tatanus: what about making a news quiz site? there could be variants for kids, teens, adults.

pagreen@mac.com: But would kids go to CNN?

WKUComanche: with prizes by contributors

Jeffrey Tatanus: if there were prizes from sponsors

WKUComanche: kids cnn? it's a classroom assistance thing

WKUComanche: jeff? are you inside my brain?

Jeffrey Tatanus: or even just a competition between friends / classes?

pagreen@mac.com: I don't know how we could send them tangible prizes.

pagreen@mac.com: Competition is always good. Everyone likes to be best at something.

WKUComanche: we don't, advertisers do

Jeffrey Tatanus: get parental permission and a mailing address

jonnyoosting: or they can win spendable "online" cash

jonnyoosting: or whatevs

pagreen@mac.com: Yeah, we might do better if they got credit to iTunes or something else online. Cut down on shipping costs.

Jeffrey Tatanus: visa buxx or whatnot?

jonnyoosting: yups

WKUComanche: good thinkin

WKUComanche: new idea

Jeffrey Tatanus: man, i would so compete in that.

pagreen@mac.com: Me too.

WKUComanche: i see a lot of editorial shit out there

pagreen@mac.com: But then again, we're already involved.

WKUComanche: not much is qualified or justified

pagreen@mac.com: Who's turn is it for idea sharing?

22:00

pagreen@mac.com: I have some more, but I'll wait my turn.

WKUComanche: i'm trying right now dammit

Jeffrey Tatanus: ryan is sharing his idea

WKUComanche: editorial shit?

pagreen@mac.com: Sorry.

WKUComanche: thank you

jonnyoosting: hmmm?

pagreen@mac.com: I thought you were venting.

WKUComanche: as i said, i would like to see an experienced, educated person respond to the uninformed or uneducated or ridiculous editorial post out there

WKUComanche: simon cowell or something

WKUComanche: it might be funny, but informative

Jeffrey Tatanus: some sort of a validation process?

WKUComanche: no humor

jonnyoosting: interesting. i like it. but how do we get an expert for every editorial issue?

pagreen@mac.com: How would we decide who was balanced?

WKUComanche: example

WKUComanche: intelligent design blog... biology prof

jonnyoosting: well, yeah. but would we have to physically call them for their response?

Jeffrey Tatanus: oh boy, throwing ID into the mix... haha

pagreen@mac.com: And some people would still cry "spin."

WKUComanche: nah, they would do it to correct the misinformation

WKUComanche: defend it with data

jonnyoosting: kind of like penn and teller's Bullshit?

Jeffrey Tatanus: defending with the data is difficult.

WKUComanche: science, politics, terror, tech

Jeffrey Tatanus: and it still puts a spin on it

WKUComanche: bullshit!

WKUComanche: o'reilly factor anybody... no spin zone

WKUComanche: fair and balanced

pagreen@mac.com: What Jeff's saying is BS, or stuff in general?

jonnyoosting: no, the show by penn and teller is named Bullshit

22:05

pagreen@mac.com: I've never seen that. What is it?

Jeffrey Tatanus: penn and teller's bullshit is great, but they definitely put an opposing side to some issues.

jonnyoosting: It's a show where they debunk or crack holes in crackpot theories

WKUComanche: breastfeeding was a good epi

jonnyoosting: crack holes in crack pots!

WKUComanche: numbers too

pagreen@mac.com: I see.

WKUComanche: abstinence was the absolute best episode

jonnyoosting: I haven't seen it much since season 1

WKUComanche: we are told one thing to be true: poll numbers for example

WKUComanche: BS showed how the questions could be manipulated to get any response they wanted to come out of it

Jeffrey Tatanus: <http://vids.myspace.com/index.cfm?fuseaction=vids.individual&videoID=2030157220>

here's a link to one episode of bullshit

WKUComanche: many people don't know that polls are inaccurate, so they exposed it

pagreen@mac.com: I'll have to check that out later.

WKUComanche: what do you think?

Jeffrey Tatanus: i think that making the news fun somehow could be very effective

pagreen@mac.com: An interesting idea, but how would we apply it to straight news.

Jeffrey Tatanus: a lot like the daily show

WKUComanche: it's for editorial blogs

WKUComanche: put it on a site like cnn and let a prominent staffmember select and feature a few a week

Jeffrey Tatanus: maybe an e-'daily show' type of thing.

WKUComanche: yes yes

WKUComanche: how'm I doing?

Jeffrey Tatanus: thats a clever idea, something we can definitely build from

WKUComanche: jon you go now

22:10

WKUComanche: ding... jeff go!

Jeffrey Tatanus: okay, ryan's idea leads into two of mine

jonnyoosting: Well, I shared my best two ideas at this point. Another I mentioned on the blog is some sort of a way to track the history of a news story - so that readers can easily see the history of a topic

jonnyoosting: Go ahead Jeff

pagreen@mac.com: That's a good idea. Instant context.

Jeffrey Tatanus: gmail applied to news, eh?

pagreen@mac.com: How so?

Jeffrey Tatanus: gmail threads email messages together

pagreen@mac.com: I see.

Jeffrey Tatanus: threading news updates together like that could be a neat interface

Jeffrey Tatanus: but anyway, my ideas...

WKUComanche: very good stuff

Jeffrey Tatanus: side vs. side for editorials (kinda like helium.com)

Jeffrey Tatanus: point/counterpoint

Jeffrey Tatanus: allow users to participate in the debate somehow

pagreen@mac.com: What makes it different from a regular blog discussion?

Jeffrey Tatanus: i havent really developed the idea much beyond that, but it eliminates the media outlet being labeled as "liberal" or "conservative"

Jeffrey Tatanus: it would display both sides of the issue

jonnyoosting: there's a place for that, but as Jon Stewart pointed out on crossfire, simplifying and issue to only two perspectives often only creates polarization rather than dialogue.

jonnyoosting: some issues have many more than two "sides"

WKUComanche: that's right

Jeffrey Tatanus: indeed

Jeffrey Tatanus: gay marriage is a definite example of that one

WKUComanche: my articles for my last class never had 2 sides only

WKUComanche: 3 or 4 min.

22:15

pagreen@mac.com: Then you have to go?

Jeffrey Tatanus: another idea i had was a BS-o-meter... megan and i came up with that together

WKUComanche: min. = minimum

pagreen@mac.com: We should change the name for it.

WKUComanche: bitchin' just like our ingenious "tourist trap index" everybody liked

Jeffrey Tatanus: thats the 'working title'

Jeffrey Tatanus: yes they LOVED the TTI idea

WKUComanche: call it the shit pile

WKUComanche: then on a side bar offer canoes or wings to stay above it

pagreen@mac.com: I like it personally, don't get me wrong.

jonnyoosting: yeah. sounds good. but would news sites voluntarily put a BS meter on their articles?

Jeffrey Tatanus: megan, what do you think about how the BS-o-meter? like how would it work?

WKUComanche: shit pile

jonnyoosting: what'd you call me?

jonnyoosting: hahah

WKUComanche: get a shovel and meet me in ky I'll demonstrate

pagreen@mac.com: It would be used on user generated content, not journalists' stuff.

WKUComanche: we actually have these here

Jeffrey Tatanus: haha

jonnyoosting: okay megan, I gotcha. I like it.

WKUComanche: it's great

Jeffrey Tatanus: yes, to (as US news puts it) "add civility to the cacophony"

pagreen@mac.com: Sort of a way of allowing people to lodge objections to incorrect facts. If the BS meter got high enough, the story would be pulled.

WKUComanche: that's where it's brilliant

jonnyoosting: why pull it? let people see the bs.

jonnyoosting: for what it is

Jeffrey Tatanus: perhaps reputable people (professors, experts) could have more say

WKUComanche: except that popular speech doesn't need protecting

WKUComanche: dissent can be overruled in that case quite easily

pagreen@mac.com: Seems right to me. And we'd need a moderator to make sure the objections were legitimate, not just because of opinions.

Jeffrey Tatanus: explain.

WKUComanche: opinion

Jeffrey Tatanus: the "popular speech doesnt need protecting"

WKUComanche: it doesn't

pagreen@mac.com: The idea isn't to correct people's opinions, just their facts.

WKUComanche: not enough people would oppose pop. speech

22:20

WKUComanche: by definition

pagreen@mac.com: Possible. However, minorities tend to become vocal online.

WKUComanche: i just mean that pulling the post might be too harsh

jonnyoosting: i agree

jonnyoosting: pulling content will enrage

Jeffrey Tatanus: and just make people more vocal with their wrong ideas

jonnyoosting: pulling smacks of censorship, even if we all agree dumb people should apply a little self-censorship from time to time

pagreen@mac.com: Maybe then just some sort of marker?

WKUComanche: better

jonnyoosting: yeah. a steaming pile?

Jeffrey Tatanus: "here's your sign..."

WKUComanche: featuring ads from rubber boot companies

jonnyoosting: lol

Jeffrey Tatanus: or porta-john companies 😊

jonnyoosting: Well folks, anybody got any ideas they really want to run by the group tonight yet? Otherwise, I'm thinking we should wrap soon.

WKUComanche: megan has more

Jeffrey Tatanus: check out snopes.com for debunking morons.

pagreen@mac.com: I could use some more time to percolate.

pagreen@mac.com: Would we chat Sunday, or wait until Tuesday?

jonnyoosting: Let's do Sunday, so we can finalize our list, etc...

22:25

pagreen@mac.com: Okay. What time?

jonnyoosting: Same. Any objections?

Jeffrey Tatanus: 9pm?

WKUComanche: sunday's good here, but i might need 10:00pm eastern

jonnyoosting: 10 is fine

Jeffrey Tatanus: 10 est works fine for me also

pagreen@mac.com: That might be better.

jonnyoosting: 10 it is!

WKUComanche: i know i work sunday, but i might be a bit late getting out of there

WKUComanche: thanks y'all

WKUComanche: we need to prepare ideas to share right

WKUComanche: and post our sites on the blog right?

jonnyoosting: Jeff - I created a sample June 14 Chat page for the blog. I'll update it now and you can decide if it's a format we can use in the future.

jonnyoosting: yeah - keep posting

jonnyoosting: I'm out. Peace

Jeffrey Tatanus: see ya job!

pagreen@mac.com: Until Sunday.

jonnyoosting: It's G-O-B!

jonnyoosting: haha

Jeffrey Tatanus: *jon

Jeffrey Tatanus: haha

Jeffrey Tatanus: oh dear, arrested development...

WKUComanche: bye crazy kids
